

Citrix Consulting Services

Our expert consultants will design, deliver, and secure your Citrix solution. So you see maximum return on investment (ROI), and better business outcomes, faster.

Gain a powerful strategic partner

9/10

Citrix Consulting customers say we assist with long-term decision making, or act as an extension of their in-house team.¹

We'll help you to define your long-term strategic vision, and then we'll make it a reality, delivering Citrix solutions that are custom-made for your organization. At every step, you'll benefit from our unrivalled understanding of what Citrix products can do today, and what they will do tomorrow.

1. TechValidate. TVID: 5C8-727-68F

Get started—and see value—faster

97%

of Citrix Consulting customers say we implement faster than other vendors.²

We move fast. However urgent your needs, our worldwide team has the depth of skills and resources to deliver to your schedule. And because we'll get deployment right first time—and optimize your end-user experience—you'll see more value, more quickly.

2. TechValidate. TVID: CC1-3BE-1A1

Optimize your business outcomes

97%

of Citrix Consulting customers say we deliver better business outcomes than other vendors.³

Citrix consultants have an average of five years' experience working with organizations just like yours. Applying lessons learned and leading practices, they will design and deliver solutions that make the most of your existing technologies, and optimize your business outcomes.

Engage our experts remotely

More flexibility.
Less cost.

We deliver our services however works best for you. Which, often, will mean remotely.

Almost everything we can do in-person, we can also do at a distance. If you have a globally distributed team, bringing your stakeholders together on a video call can make a lot more sense than flying everyone to the same location. Progress happens faster, and your travel costs are lower.

Cloud
Strategy and transition

Whatever your current IT infrastructure and future business goals, we'll design your optimal cloud strategy, and deliver a seamless cloud transition.

You can rest easy. Our experts will identify your business drivers, develop your new architecture, deploy your Citrix Cloud services, define your migration strategies, optimize your end-user experience, and find every possible way to boost your ROI.

Digital workspaces
Design and deployment

We'll help you to simplify and secure your IT architecture, by moving from a distributed model to a unified Citrix Workspace.

Our consultants will review your environment and needs, develop a validated blueprint for your new workspace, plan your migration, deploy your customized solution, and deliver the best experience for your users.

Networking
Transformation and security

Our experts can help you to transform and secure your entire corporate network, accelerate application performance, improve network resilience, identify and mitigate existing and emerging threats, and optimize hybrid cloud scenarios.

Following a thorough assessment of your network's risks and opportunities, we'll deploy the proven Citrix products you need, in line with leading practices.

Our experts

- 350 consultants worldwide
- Seasoned consultants with years of enterprise deployment experience
- 10 years, on average — our Citrix architects' experience
- Certified Information Systems Security Professional (CISSP) certified consultants

“
Citrix Consulting gave us an external view of our architecture, allowing us to pinpoint all its weaknesses. They also took our limitations into account when proposing a solution.

The outcome was a perfect balance between our resources and the improvements we were able to make.”⁴

David Morin, Senior IT Architect,
GlaxoSmithKline Vaccines
